

1. Find the maximum element in an array.

2. Find the minimum

element in an array.

3. Find the second largest

element in an

array.

4. Find the second smallest element in an array.

5. Find the third largest element in an array.

6. Reverse an array.

7. Sort an array in ascending order.

8. Sort an array in

descending
order.

9. Check
whether an
array is
sorted.

10. Find the sum of all elements in an array.

11. Find the average of all

elements in
an array.

12. Find the
product of all
elements in
an array.

13. Find the largest and smallest elements in a single traversal.

14. Search an element using Linear Search.

15. Search an element

using Binary
Search.

16. Count
even and odd
numbers in
an array.

17. Separate even and odd numbers.

18. Move all zeros to the end of the

array.

19. Move all zeros to the beginning of the array.

20. Remove

duplicate
elements
from an array.

21. Find
duplicate
elements in

an array.

22. Count the frequency of each element.

23. Find the most

frequent
element.

24. Find the
least
frequent
element.

25. Find the missing number in an array (1 to N).

26. Find multiple

missing
numbers in
an array.

27. Find the
first missing
positive

number.

28. Find all pairs whose sum is equal to a given number.

29. Find all triplets whose sum is equal to a given number.

30. Find the

union of two
arrays.

31. Find the
intersection
of two arrays.

32. Merge

two sorted
arrays.

33. Merge

two unsorted
arrays.

34. Rotate an

array to the
left by K
positions.

35. Rotate an
array to the
right by K

positions.

36. Find the maximum difference between two elements.

37. Find the minimum difference between two elements.

38. Find the

equilibrium
index of an
array.

39. Find the
leaders in an
array.

40. Find the majority element in an array.

41. Find the k th largest

element.

42. Find the k th smallest element.

43. Find the longest

consecutive
sequence.

44. Find the
subarray with
the
maximum

sum

(Kadane's
Algorithm).

45. Find the
subarray with
the minimum

sum.

46. Find all subarrays of an array.

47. Find the length of the

longest
subarray with
a given sum.

48. Check
whether two
arrays are

equal.

49. Find
common
elements in
three sorted
arrays.

50.

Rearrange
the array in
alternate
positive and
negative

order.
