first non-
repeated
character.

10. Find the first repeated character.

11. Find the last non-repeated

character.

12. Find the last repeated character.

13. Count the frequency of

each

character.

14. Count the
occurrence
of a specific
character.

15. Check
whether two
Strings are
anagrams.

16. Check
whether two

Strings are
rotations of
each other.

17. Check
whether a
String

contains only
digits.

18. Check

whether a

String

contains only

alphabets.

19. Check

whether a

String

contains only

alphanumeric

characters.

20. Remove

all

whitespace

from a String.

21. Remove

all special
characters
from a String.

22. Replace
multiple
spaces with

a single
space.

23. Find the
longest word
in a sentence.

24. Find the

shortest
word in a
sentence.

25. Count the
number of
words in a

sentence.

26. Reverse
the order of
words in a
sentence.

27. Sort the

characters of
a String
alphabetically

.

28. Sort the
words of a

sentence

alphabetically

.

29. Find the

longest

common

prefix among
Strings.

30. Print all
substrings of
a String.

31. Print all

possible
permutations
of a String.
32. Print all
possible
combinations

of
characters.

33. Check
whether one
String is a
substring of

another
without using
contains()).

34. Find the
index of a
substring

without using
indexOf().

35. Remove a
specific
character
from a String.

36. Remove a
specific word
from a
sentence.

37.

Compress a

String (e.g.,
aaabbcc →
a3b2c2).

38.

Decompress

a

compressed
String.

39. Find the
longest
substring
without

repeating
characters.

40. Find the
longest
palindromic
substring.

41. Find the common characters between two Strings.

42. Find the

missing
character
between two
Strings.

43. Compare
two Strings

without using
equals()).

44. Check
whether two
Strings are
equal

ignoring case
without using
equalsIgnoreCase
Case()).

45. Convert
the first letter

of every word
to uppercase.

46. Toggle
the case of
every
character in a

String.

47. Separate
alphabets,
digits, and
special
characters

into different
Strings.

48. Extract all
numbers
from a String
and calculate

their sum.

49. Validate
whether a
String is a
valid email
format.

50. Find the most frequently occurring character in a String.
